

# HINDUSTAN FORGING & ENGINEERING WORKS

## ABOUT US

Established in 1972, we introduce ourselves as one of the leading manufacturers of quality Open & Pot Die Forgings, specializing in supplying custom forgings up to 04 Tons to major industries in graded steels i.e. Mild, Carbon, Alloy & Stainless Steel and are tailored to each customer specific needs. With an ideally located, impressively equipped facility, HFEW is able to handle a range of jobs from the smallest, simplest parts to the largest and most intricate forgings.

In business for almost 50 years, HFEW has the skill and experience to tailor forgings to your exact specifications with the utmost precision and strives to be the most innovative and reliable suppliers and will continue to do so in the future.

We look forward to work with customers on a long-term business relationship through a transparent and committed interaction.

Our objectives and goals have been to attain the highest technical performance at the most competitive price.

### Mission Statement

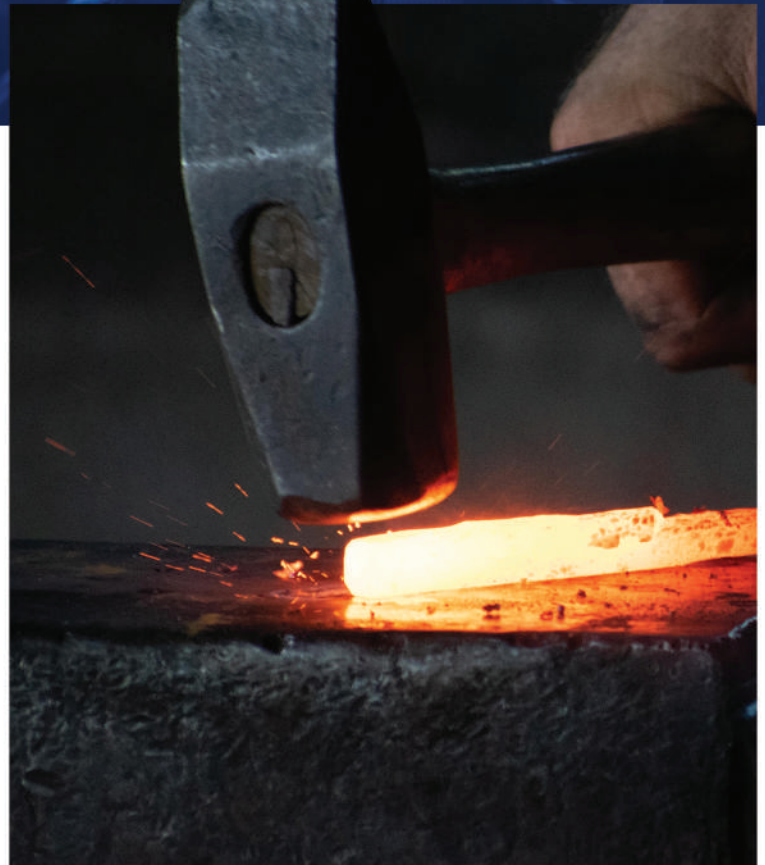

To be the most dependable and preferred forging supplier by exceeding customer expectation for quality at competitive costs, providing value and timely service through knowledge based happy organization.

### Vision Statement

HFEW chooses to be one of the most respected companies in their industry by setting the standard for quality products and services. Our continued growth and success is based on forging long term partnerships with our clients and suppliers and by promoting and rewarding excellence in the performance of our employees which we believe will help in achieving competitive advantage.

### Business Philosophy

Our philosophy is to find the best engineering solution for the customer's particular requirements, which results in the creation of long standing commercial relationships built on mutual trust and understanding. HFEW prides itself in having a very close working relationship with its customers and has a much focused market driven philosophy.

## INFRASTRUCTURE

Our infrastructure helps us to sustain our success by constantly enabling us to respond to the demands of our customers.

From raw forgings to ready-to-install components - our forgings meet the highest quality requirements for various applications. From the range of our forging equipment we select the most economic and efficient manufacturing processes for your products. Subsequently, we are able to satisfy almost all kinds of customer requirements in forging. We are pleased to advise you about the various combination possibilities of forging and machining at the most economic cost-performance-ratio.

### Equipments

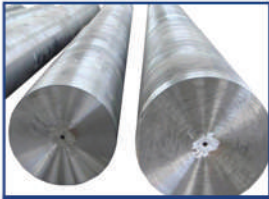

- Pneumatic Hammer 02 Tons - Massey
- Forging Hammer (Compressor) 05 Tons
- Oil Fired Heating Furnace – Heating Capacity 4 Tons
- Gas Fired Heating Furnace – Heating Capacity 7 Tons
- 01 No. Normalising Furnace - 4 Tons
- 04 Nos. EOT Cranes – 10 Tons Each
- 03 Nos. Bandsaw Machine
- 02 Nos. Plano Miller
- 04 Nos. Milling Machine
- 05 Nos. Lathe Machines

# PRODUCTS

Forging can be customized to meet the wide material specifications of our clients. Our products vary from the weight range of 15 kg - 4000 kg and include a wide spectrum of products like

**Rounds / Shafts**

**Flats**

**Step Forgings**

**Rings**

**Pot Die Forgings**

**Gear Blank**

**T Head Bolts /  
Foundation Bolts**

**Pinions / Pins**

**Crank Shafts**

**Hollow Rounds**

Forging can be supplied in as Forged condition, proof machined, or after final machining. Normalizing, hardening and tempering as per customer requirements can also be done.

## QUALITY

Quality and customer focus is of utmost importance and we strongly believe in providing total customer satisfaction through excellence in product offering, proactive approach to quality issues, quick response to customer, transparency in transaction & price competitiveness.

Quality steel is procured from the most reliable sources; Kalyani Special Steels Ltd, Mahindra UGINE Steel Co. Ltd, Steel Authority of India Ltd to name a few. We are highly conscious of the critical areas where our products are used. We have records for the history of each product, along with evidential test results, stage inspection reports.

### We at HFEW

- Collaborate with our customers and suppliers to develop product and delivery requirements to which we can commit.
- Strive to meet or exceed any commitment we make to a customer.
- Continually seek to improve the satisfaction of our customers and the effectiveness of our quality system.

Some of the sophisticated inspection and testing are carried out at NABL & Govt. approved laboratories, assuring product quality and reliability which help us to protect the customer and provide the right product.

Destructive & non-destructive testing for forgings in conformance with International standards.

### Our Quality system covers the whole ground

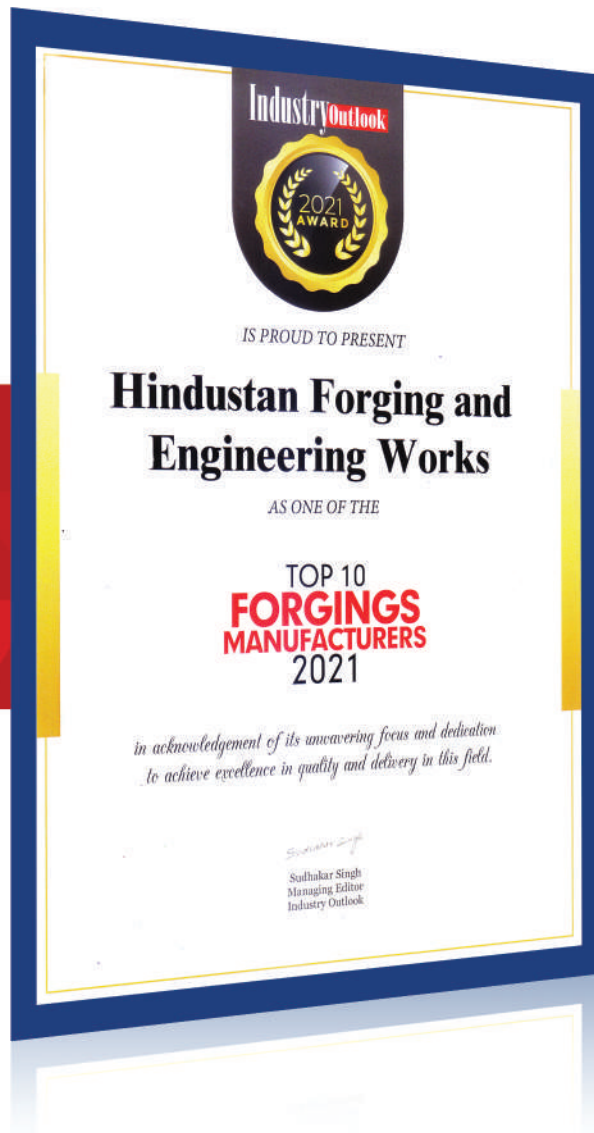

- Acceptance plan and testing of 100% raw material supplies.
- In-depth testing and research, based on specific customer requirements.
- Strict implementation of established processes.
- Calibration and maintenance of testing, measuring and equipments.
- Constant and continuous consultation with customers and suppliers on all technical aspects.
- Setting and control of quality standards for forging as per quality plan.
- Quality is built into our system at every processing stage to ensure the stringent requirements of the customer in conformance with international standards.
